

# **HOLD ON THE FIGHT AGAINST CIE!**

A few days ago, a new laws concerning illegal immigrants became effective. These laws called "Pacchetto Sicurezza" provide to extend the detention into the CIE (as corso Brunelleschi) from 2 to 6 months.

The last February, some escape attempts and many riots into the Centres delayed the coming into effect of this law. Now the government is trying again, stirring up new riots into the CIE. Since 8 August, in Gradisca, Milan, Turin, Lamezia, Bari, and Modena the prisoners were in fight again and some of them gone on a hunger strike. These new riots brought so many damages to the structure that the numbers of new prisoners decreased. We can count for that at the minimum 100 places less!!!

During these last days, the prisoners have been supported by antiracist groups in many different manners. Many pickets around the Centres took place in different towns of Italy and many lawyers have been consulted, from the people who's fighting for the closing down of the CIE and for the freedom of illegal immigrants.

All together, immigrants and Italians, prisoners and free people, we could continue the fight and incite to a new escape attempts or to a big new riot. Anyway, we can always put the pressure on the organisations that earn on the CIE, as Red Cross and CAMST, the food provider in Turin.

Our fight will be long and hard, but we could win it!!
