

Every day in the streets we come together to stand **against to the use of quit notice**, in Porta Palazzo and Barriera di Milano.

We make a crowd of people **to defend our apartments**, from which landlords and banks wants to throw us out because we don't have enough money to pay the rent or the bank, or we think is unfair to pay them.

In order to weak the resistance of the crowd the city authority invent the "surprise quit", this make the police troups **to come against our houses with jeeps and wagons**, without preinforming, to force the entrance doors for throwing us out in the streets. Mobilepolice and the forcemen often **threaten** to "remove the state permit" of those who are not born in Italy and the Municipality, through the social workers, make us know that who is not italian citizen "should back to his or her own country" if they loose their house.

They try to scare and separate, but we are able to react keeping on organizing the resistance and occupying empty houses, we take direct what we need!

The 28th of March the Turin mayor- **the Mayor of "surprise quits" and evictions, of blackmails and threats** -will make a public conference in a Borgo Aurora hall, in exact place where everyday we find ourselves to resist.

He comes to our house! And we have to go to his presence to tell him that he is not welcome!

We don't want to negotiate with him, we are defending ourselves and our children's dignity!

Meet us Friday 28th March, from 5.30 pm via Pisa across via Ancona (bus 18, stop Parma)!
